

Data Analyst Assignment

Topic: Recovery Index for Airlines in India & the Gulf

Problem Statement

The global aviation industry was significantly disrupted by COVID-19. Airlines across regions recovered at different speeds depending on financial strength, fleet strategy, passenger demand, and operational efficiency.

The objective of this assignment is to **analyse and compare the recovery trajectory of major Indian and Gulf airlines** by evaluating key financial and operational indicators **before and after COVID-19**, using **2019 as the baseline year**.

You are expected to derive insights from real-world data and present them in a structured, analytical manner.

Airlines to be Analysed

Indian Airlines

1. IndiGo
2. Air India
3. SpiceJet

Gulf Airlines

1. Emirates
 2. Etihad Airways
 3. Qatar Airways
-

Time Period

1. **Baseline year:** 2019
 2. **Recovery period:** 2020 to 2025 (latest available data / estimates)
-

Key Factors to Analyse

Each airline should be analyzed across the following **five dimensions**:

1. **Revenue & Financial Performance**
Overall revenue trends, profitability or loss patterns, and financial recovery relative to 2019 levels (using publicly available financial disclosures or credible estimates).
2. **Passenger Traffic Recovery**
Passenger volumes, growth trends, and recovery pace compared to pre-COVID levels, including domestic and international traffic.
3. **Capacity & Load Factor**
Seat capacity (ASKs or equivalent), load factor trends, and how effectively airlines are filling seats as capacity returns.
4. **Fleet Size & Utilization**
Changes in fleet size, aircraft utilization, and deployment of narrow body versus wide body aircraft during the recovery period.
5. **Network & Route Expansion**
Number of destinations served, route additions or reductions, and expansion into long-haul or new international markets.

Deliverables (Mandatory)

1. **Executive Summary** (PDF – Max 2 Pages)
Key findings and insights
India vs Gulf comparison
Clear conclusions supported by data
 2. **Combined Data Sheet** (Excel / Google Sheets / CSV)
One consolidated dataset for all airlines
Data sources mentioned clearly
 1. **Visual Analysis** (Can be a separate PDF, PPT, or Excel file)
Charts/graphs showing:
 - a. Recovery over time
 - b. Airline-to-airline comparison
 - c. India vs Gulf comparison
-

Submission Guidelines

1. All deliverables must be shared **directly via email** as attachments (PDF, Excel, or Word formats).
Kindly **do not share Drive or cloud links**.
2. Each file must be clearly named using the following format:
(YourName)_Summary.pdf
(YourName)_DataSheet.xlsx
(YourName)_Visuals.pdf *(or .pptx / .xlsx if applicable)*
3. Ensure all files are readable, properly formatted, and submitted in a single email.
